

Every 3D Model Marketplace

Alex Aldridge, Canada

June 26, 2023

I tried uploading to every available 3D model marketplace in 2022-23. I couldn't upload my 3D models to every marketplace site consistently because of how much work was involved. I now focus on Cults, CGTrader, Cubebrush, 3DExport, Thingiverse and Thangs. I changed my business structure from personal to professional and to do this I made new marketplace accounts. This made it more complicated and difficult to organize all of my 3D models across every marketplace. I also focused on selling on Cults because it was producing the most money and traffic. I changed as many personal account names and URLs that I could but not all of them could be changed.
